GROUNDS

On December 23, 2024 the Regional Director for Environmental Protection in Gdańsk received a request of C-Wind Polska Sp. z o.o., acting through the proxy Ms. Magdalena Kiejzik-Głowińska, EKO-Konsult Sp. z o.o., for an amendment to the decision on environmental conditions, ref. No.: RDOŚ-Gd-WOO.420.50.2021.KSZ.AM.10 of September 16, 2022, issued by the Regional Director for Environmental Protection in Gdańsk for the project named: "BC-Wind Offshore Wind Farm" (hereinafter referred to as the BC-Wind OWF).

In the procedure initiated upon the above-mentioned request of December 23, 2024, the Regional Director for Environmental Protection issued a decision on environmental conditions, ref. No.: RDOŚ-Gd-WOO.420.89.2024.AM.7 of July 1, 2025,

On July 10, 2025 by letter without the number of July 7, 2025, the Investor requested that the contents of the decision of July 1, 2025 be supplemented in the following scope:

- 1) adding point No.: 35 development area in point 1.1 to the table containing geodetic coordinates of the BC-Wind OWF development area (World Geodetic System 1984 system);
- 2) restoration in point 1.1) of the project boundaries indicated in the amended environmental decision of September 16, 2022.

With the contents of this decision, the Regional Director for Environmental Protection in Gdańsk, agrees with the Investor's request to supplement the decision of July 1, 2025.

When preparing the final version of the decision in the table titled: "Geodetic coordinates of the BC-Wind OWF development area (World Geodetic System 1984)" on page 5, line No.: 35 was missing. The missing line was mentioned in the request of December 23, 2024 for an amendment to the environmental decision for the project in question. Moreover, the local authority indicates that in the characteristics of the decision of July 1, 2025, the identical table containing the above-mentioned

coordinates is complete, i.e. it contains line No. 35.

The above indicates that the lack of a line in the table constitutes a typographical error, thus page 5 of the decision, ref. No. RDOŚ-Gd-WOO.420.89.2024.AM.7 of July 1, 2025 should have been supplemented with the missing line of the table.

In the amended decision, the boundaries of the project were indicated as the development area, as it was presented in the documentation submitted together with the request for an amendment to the decision of December 23, 2024. The report attached with the request does not indicate geometric coordinates titled "project boundaries". Also in the column "proposed amendments" in the request for an amendment to the decision, the Investor did not include the table of coordinates which it currently requests to be supplemented, but only the boundaries of development. However, since the submitted documentation contains the quote. *"The boundaries of the proposed project remain unchanged in relation to the boundaries for which the decision on environmental conditions was obtained."* (page 40 of the EIA report), as well as taking into account the fact that at the design stage all the follow-up documents contain the boundaries included in the decision of 2022, i.e. in the amended decision, this authority supplements the decision of July 1, 2025, indicating in point I 1) a table with coordinates of the project boundaries. Thus, both tables are included in the content of the supplemented point, i.e. the project area table and the development area table.

With regard to the foregoing, I decide as in the introduction hereto.

This decision may be appealed against to the General Director for Environmental Protection through the Regional Director for Environmental Protection in Gdańsk within 7 days from the date of delivery hereof.

The decision, which has been supplemented by this decision, may be appealed against to the General Director for Environmental Protection through the Regional Director for Environmental Protection in Gdańsk within 14 days from the date of delivery hereof.
